

34261-Reply to the reviewers' comments

- 1- The English language of the editorial has been edited and the corrected version has been attached
- 2- The author has explained why we should start counseling and PSA testing just before the age of 50 years i.e. as many confirmed cases have been detected in the age of 47 and 48, also the PSA distribution in this region is lower than Europe and USA.
- 3- I see it is normal to include phrases from the text to the abstract and core tip.
- 4- Raw data for the figure

Country	ASIR
Lebanon	39.2
Bahrain	14.6
Jordan	14.6
Morocco	13.5
Kuwait	13.3
Tunisia	11.4
Qatar	10
Egypt	9.3
Oman	8.5
UAE	7.5
Sudan	7.3
