Editor-in-Chief
World Journal of Orthopedics

June 25th, 2019

Dear Editor,

Thank you for considering our manuscript "Os Calcis Lipoma: To Graft or not to Graft?" by Theodosios Alexopoulos, Peter Grigoris and Theodoros Balbouzis for publication in World Journal of Orthopedics.

Following the suggestions of the reviewer, we have made the following amendments to our initial manuscript:

1. We have included the series of Radl et al. in our literature list.
2. We have responded to the reviewer's comments, by mentioning that the treatment of an os calcis lipoma should be individualized and by accepting that our patient's follow-up is indeed not longer than many series found in the literature review.
3. We have submitted our manuscript for English language correction to a professional proofreading company and we are enclosing their certificate.
4. We have created an audio file, describing our core tip.
5. We have made a Powerpoint presentation with the editable form of our images.
6. We have created a PDF with the first pages of every cited case report or series without a DOI.
7. We have signed once again the Copyright Licence Agreement.

We hope that you find our amendments adequate for publication of our manuscript in World Journal of Orthopaedics. We are at your disposition for further changes, if required.

Thank you for your consideration!

Sincerely,

A handwritten signature in black ink, appearing to be 'Theodoros Balbouzis', with a stylized, flowing script.
