### **SPECIFIC COMMENTS TO AUTHORS**

I had the opportunity to review a study concerning a field of high interest. I recommend publication in the WJO. Do you have any data with regard to grade of patients acceptance and for instance scores (HHS/WOMAC) pre- and postoperative comparing both approaches? Good luck with your future work!

Response:

Dear Reviewer,

This study was focusing on alpha angle correction alone without comparing it to pre and post operative outcomes in both approaches. We agree, this would be of interest and future research will be focused on linking surgical approaches to functional outcome. Thank you for your review and feedback.

### **SPECIFIC COMMENTS TO AUTHORS**

There are only some orthographic/grammar remarks. I recommend to accept the manuscript "as is" with the exception of the few remarks.

Response:

Thank you for your time and consideration.
