

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Minor revision

#### **SPECIFIC COMMENTS TO AUTHORS**

I think the topic of study is interesting. However, I suggest that authors consider the following points: 1. The Background section is poorly written. The authors should explain more about intertrochanteric fractures and their different treatments. 2. I suggest the authors add a list of abbreviations at the end of the manuscript.

Dear reviewer, thank you very much for your questions. I have added to the background section about the intertrochanteric fractures and the treatment methods. A list of abbreviations was added at the end of the article.
