

February 20, 2017

Dear Editors,

Dear Reviewers,

Herewith I resubmit the revised version of the manuscript entitled “ Light and electron microscopic study of the medial collateral ligament epiligament tissue in human” (Ms. No. 32018) by Georgi P. Georgiev, Alexandar Iliev, Georgi Kotov, Plamen Kinov, Svetoslav Slavchev and Boycho Landzhov.

According to the Editor’s and Reviewers’ comments we rewrite our manuscript

Details of the changes made are included below. They are marked in red in the revised text.

**Reviewer 00364821:**

The article by Georgiev and colleagues demonstrates that significant differences exist between the normal structure of the ligament and the epiligament. . The conclusion can offer some valuable guidances to the clinical practice. The content is clear and definite, level of structure is logical and accurate. The research method is scientific and reasonable .The article is well-written. There are, however, a few minor issues that should be addressed. 1.Please write out the detail information of the reagents, such as the company, lot number, etc..

WE ACCEPT ALL REVIEWERS SUGGESTIONS. WE ALSO CHANGE THE TITLE TO BE  
MORE CLEAR AND ACCURATE

**Reviewer 01220036**

as above

WE ACCEPT ALL REVIEWERS SUGGESTIONS. WE ALSO CHANGE THE TITLE TO BE  
MORE CLEAR AND ACCURATE.

We hope that the revised version of the manuscript will be of interest for your journal.

Looking forward to your decision,

Yours sincerely,

Georgi P. Georgiev
