Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: revisedmanuscript.doc).

Title: Atypical neurological symptoms associated with CGG expansions of the FMR1 gene

Authors: Esteban Peña (Editorial Board Member NO 00646583), Marcos Llanero

Name of Journal: *World Journal of Neurology*

ESPS Manuscript NO: 4234

The manuscript has been improved according to the suggestions of reviewers:

REVIEWER NO 00646305

Changes have been made in the manuscript according to the suggestions of the reviewer. Unfortunately, the number of CGG repeats of the family members of patient 1 is not available. It is due to the fact that we knew their condition of carriers via clinical forms where the number of CGG repeats was not provided. Finally, there were not neurological disorders in any member of the family of patient 2. Indeed, till now, none of them has performed a genetic study of the FMR1 gene. Thus, due to the lack of relevant information, we decided not to provide the pedigree of the patient 2 in our manuscript.

REVIEWER NO 00477730

Changes have been made in the manuscript according to the suggestions of the reviewer.

Thank you again for publishing our manuscript in the *World Journal of Neurology*.

Sincerely yours,

Esteban Peña, MD
