

Dear Dr. Wang,

Thank you so much for considering my manuscript for publication. This is obviously an honor to get published in your kind journal and I indeed feel humbled.

I also want to appreciate the time and effort that reviewers put for my manuscript. I read their comments with interest and I found their opinions very sharp, to-the-point and helpful. I am sure that they helped my paper to enrich more and added to the scientific value of this paper.

Below are my replies to reviewers:

Reviewer 05566451: 1) Done, I decided to omit the phrases "foot-first" and "head-first" as they are not professional terms. 2) Done, 3) all of references were rechecked, those which do not have digital identifiers in the reference list actually do not have that in their citation provided by their publisher. Therefore, the same citation provided by the publishers have been used and all are accurate. Thank you however for your sharp comment.

Reviewer 05115591: Much appreciated. Thank you so much for all your time you put to review the manuscript.

Company Editor-In-Chief: Thank you so much for your comment. I turned the figures into a PowerPoint, and I added the phrase ©Azimirad 2022. I also want to announce that all figures are property of mine. They are my pencil sketches which turn into digital art. So I am the copyright owner of them. I also tried to turn tables as it was mentioned (top, bottom, and column lines visible, others hidden). Please let me know if I was not able to make them the way you preferred and I am more than happy to make the desired changes.

Once again, thank you so much,

Afshin Azimirad, MD
