Dear Editor,

We appreciate the thorough review of our manuscript and the helpful comments. We have tried to address all of the issues that were brought to our attention.. Please find a copy of each comment, along with our reply written in bold font:

<mark>**First Reviewer (05758135) comments:**</mark>

1. Everyone has own opinion. This is a good opinion for AI use in clinical scene. It is important to recognize the gap between developer and use, and how to fill the gaps should be told the third party position.

Author's reply: thank you for your comment. We are of the same opinion too. We had the paper reviewed by a native English speaker.

<mark>**Second Reviewer (05327699) comments:**</mark>

1. Dear Authors , Good write up . Thanks

Author's reply: Thanks for your comment.

In conclusion, we hope to have addressed all of the issues raised by your thorough reviews. We would be glad to further modify our work upon your request.

On behalf of the other authors, I would like to extend my gratitude for your assistance and consideration.

I look forward to your response.

Kind regards,

Elena Giovanna Bignami
