Answer to the reviewers

Dear reviewers,

we thank for the kind reviewing of our paper entitled "Algorithm-based arterial blood sampling recognition increasing safety in point-of-care diagnostics". From the feedback we conclude that there are only formal changes due.

Changes in the manuscript are:

Page 1: Addition of the postal codes. The full address is given in the corresponding author's section.

Page 1: A conflict-of-interest and data sharing statement is provided in two additional files.

Page 3: A citation section was added according to the provided format.

Kind regards,

PD Dr. Martin Schenk
