

A point-by-point response to the Reviewers' comments

Reviewers

Thank you very much for the kind words of appreciation for our paper. Concerning the comments: the text is not coherent enough. The figures are not self-explanatory. The table does not represent all the details of the main article.

I have made the required changes in the manuscript which is highlighted in yellow colour. I have made a new figure which is giving the overall presentation of major adipokines levels in hypertension. I have rechecked the table and added the studies which were missing.
