1. Authors could have provided with a comparative table comparing other similar National and International studies	Thank you very much for your suggestion. However, there are 7 tables and 2 figures in our study. All of these tables and figures are related to the findings of the research. Considering the number of figures and tables in our research, we think that adding one more table may tire the reader.
2. Introduction could be cut short	Required editing has been made in the "Introduction" section. It is marked with yellow.
3. A few more recent references can be added	New referances have been added and marked in yellow.
