Re: ESPS Manuscript NO: 15669

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: ESPS Manuscript NO: 15669).

Title: Olfactory function in psychotic disorders: Insights from neuroimaging studies

Authors: Kimberley P. Good and Randii Lynn Sullivan

Name of Journal: World Journal of Psychiatry

ESPS Manuscript NO: 15669

The manuscript has been improved according to the suggestions of reviewers:

1. The reviewer suggested incorporating the work of Wang et al (2005) to the manuscript. We have included a paragraph regarding this important work (page 14) and discussed on page 20 how olfactory imaging investigations have not begun to examine the effect of age. On page 21, we discuss how age should be taken into consideration for future studies (also mentioned in the abstract page 4).

2. The reviewer also suggested including figures to help illustrate the findings. We have added Figure 1 (page 37) which shows unpublished data from our existing dataset. Moreover, we have obtained permission to reprint Figure 2 (page 38) to further illustrate the findings. We have added notes in the manuscript where these Figures could be placed for maximal impact. We have appended the copyright permission form to this letter.

The requested formatting changes have been made, including adding a running title, a core tip, correspondence information (phone numbers etc), a conflict of interest statement, changing the citations to numbers, and including PMID and doi.

We thank the reviewers for their insightful comments and we look forward to your decision on this manuscript.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'KPG', is positioned above the printed name.

Kimberley P. Good, PhD
