April 11th, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 9678-edited.etxea.IBilbao.doc).

Title: Multiple indications for everolimus after liver transplantation in current clinical practice

Author: Itxarone BILBAO, Cristina DOPAZO, Jose LAZARO, Lluís CASTELLS, Mireia CARALT, Gonzalo SAPISOCHIN, Ramon CHARCO.

Name of Journal: *World Journal of Transplantation*

ESPS Manuscript NO: 9678

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) The reviewer suggests to highlight the effect of EVER on co-morbidities. We have checked the effect of total or partial conversion to EVER on co-morbidities such as hypertension, diabetes, dislipidemia, but unfortunately the database was not intended to explore deeply these values. They were evaluated qualitatively as "amelioration, worsening and no change". Only renal function was designed to be evaluated qualitatively and quantitatively. We have introduced some explanations in the "Material and methods" page 7, in the section Results, efficacy for other co-morbidities page 13, and in the section discussion page 19. Changes are in red color.

(2) The reviewer highlights the usefulness for the readers, and in this sense we have written the "COMMENTS" attached after each publication.

3 References and typesetting were corrected

We have added more references to do a total number of 40 references. We have typed according to the requirements: all authors, PMID, DOI.....

All changes are written in red color

Thank you again for publishing our manuscript in the *World Journal of Transplantation*.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'Itxarone Bilbao Aguirre', enclosed in a thin black rectangular border.
