ANSWERING REVIEWERS

Name of journal: World Journal of Transplantation

ESPS manuscript NO: 24434

Title: Long Term Outcomes of Cardiac Transplant for AL Amyloidosis: The Mayo Clinic Experience

Reviewer's code: 01196501

Comments to authors

In this paper, authors give some new information about long term survival after heart transplant. However, there are some questions to solve as follows: 1. Key words in abstract are loss. 2. format is not standardized following the World Journal of Transplantation

We have made all of the requested changes.

Reviewer's code: 00227470

Comments to authors

The authors presented a good overview of patients with AL amyloidosis + advanced heart failure who received cardiac transplantation. My only suggestion would be to add a study flow chart to the figures demonstrating patient selection (starting with 3117 amyloidosis patients, of whom 23 were transplanted).

We did not include this chart due to space concerns, however the information is available in text form.
