

Dear editor,

Listed below are responses to the comments from the reviewers. Reviewer comments are listed in italics and our responses in regular font.

*Reviewer code: 00227359*

*This was a well described drug adverse effect in a patient with combined SIT and RT. Histopathology was the main determinant for the differential diagnosis. Authors should highlight the influence of the experience of the transplant pathologist in the paper.*

Response:

We have amended paragraph 3 on page 4 and paragraphs 1 and 2 on page 5 to highlight this request.

*Reviewer code: 03537672*

*1. Please present the histopathologic findings of the biopsy at the time of the mild rejection on POD 13. One could not recognize how the findings of MMT toxicity were mimicking the preceding cellular rejection without it.*

Response:

We have added Figure 1 (day 13 small bowel allograft biopsy) and Figure 2 (day 13 native colon biopsy) to address this request. Previous Figures 1 and 2 are now labelled as Figures 3 and 4 respectively.

*Comments by science editor:*

*Comment:*

*A short running title of less than 6 words should be provided.*

Response:

This has been added to the amended document.

*Comment:*

*Please offer separate pdf files for the three statements and sign them in handwritten. Thank you!*

Response:

We have added these files.

*Comment:*

*Please offer more details of address, such as street or avenue. Thank you!*

*Response:*

These details have been added to the amended document.

*Comment:*

*Please offer the audio core tip*

*Response:*

We have added this.

*Comment:*

*Please write the comments.*

*Response:*

Comments have been added to the final manuscript.
