Refer to the sentence: Covid pandemic has had several negative impacts……Use the term COVID (in capital letters) throughout the manuscript

Response: Revised appropriately.

c. The authors may include a figure explaining hepatic injury in COVID infection and a table showing interaction of ASMs with medications used in COVID infection.

Response: The figure and table were added.

Reviewer #2:
**Scientific Quality:** Grade B (Very good)
**Language Quality:** Grade B (Minor language polishing)
**Conclusion:** Accept (High priority)
**Specific Comments to Authors:** It's a great original article with deep reviewing drugs that may create liver issues in patients with Covid-19. It. has some minor linguistic issues that should be corrected. It would be better if the conclusion section were extended more.

Response: Linguistic problems were corrected. Conclusion was extended.

I recommend the manuscript to be published in the World Journal of Virology. Before final acceptance, the author(s) must add a table/figure (medical imaging) to the manuscript. There are no restrictions on the figures (color, B/W). Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/.

Response: The latest high-quality references were added.
