Dear Editor,

Please find enclosed the edited manuscript in Word format (file-name: text30956)

Title: Role of imaging in the evaluation of renal dysfunction in heart failure patients

Authors: Dario Grande, Paola Terlizzese, Massimo Iacoviello

Name of journal: World Journal of Nephrology

ESPS Manuscript NO: 30956

We thank the reviewers for the constructive comments on the manuscript; the manuscript has been improved according to the suggestions of reviewers.

The manuscript was edited for English language by one native English-speaking editor.

Answers to reviewer

Reviewer 03334404: *This manuscript is nicely structured and very well written. I have no question about this manuscript. I think this manuscript deserves being considered for publication.*

We appreciate the comments of the reviewer.

Reviewer 00588968: *Authors describe a systematic review and meta-analysis about functional and cardiovascular capacity in children with chronic kidney disease and after renal transplantation. Article is well written and references are adequate, and article deserves publication.*

We appreciate the comments of the reviewer.

Reviewer 02511796: *The paper is well written and has only minor syntax errors. These are easily correctable. 1. In the title, change "function" to "dysfunction". 2. Do the same in the abstract objectives. 3. Do the same in the last paragraph of the introduction. 4. In the abstract methods, change "defined" to "assessed".*

We thank the reviewer for his/her helpful suggestions. Accordingly we change the title of the manuscript with "Role of imaging in the evaluation of renal dysfunction in heart failure patients" and correct the other errors in the text.

Best regards
