As such, we have made the preliminary decision that it is acceptable for publication after your appropriate revision.

Upon our receipt of your revised manuscript, we will send it for re-review. We will then make a final decision on whether to accept the manuscript or not, based upon the reviewers' comments, the quality of the revised manuscript, and the relevant documents.

Please follow the steps outlined below to revise your manuscript to meet the requirements for final acceptance and publication.

**Reviewer #1:**

**Scientific Quality:** Grade B (Very good)

**Language Quality:** Grade A (Priority publishing)

**Conclusion:** Accept (General priority)

**Specific Comments to Authors:** There authors; greetings of the day, i hope that you are well and safe, with big interest i read your manuscript, i found it well written, with good methodology and conclusion. My only concern is about the little samples

used in most of cited studies, so if you find studies with bigger samples it will be suitable, best regards.

-When we checked especially Pubmed for the bigger post-COVID-19 patient samples, we could not find more related to our mini review. Unfortunately, our mini review would not be more changed and lengthened.

Reviewer #2:

**Scientific Quality:** Grade B (Very good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Accept (General priority)

**Specific Comments to Authors:** This review is well written in English and highly informative, and remains highly important worldwide as there are millions of active COVID-19 cases and much more recovered COVID-19 cases who may have the post-COVID-19 syndrome. The authors could optimize the structure of the parts of Introduction and Conclusion.

- As authors, we checked the structure of the parts of Introduction and Conclusion and tried to optimize.

#### **4 LANGUAGE POLISHING REQUIREMENTS FOR REVISED MANUSCRIPTS SUBMITTED BY AUTHORS WHO ARE NON-NATIVE SPEAKERS OF ENGLISH**

As the revision process results in changes to the content of the manuscript, language problems may exist in the revised manuscript. Thus, it is necessary to perform further language polishing that will ensure all grammatical, syntactical, formatting and other related errors be resolved, so that the revised manuscript will meet the publication requirement (Grade A).

**Authors are requested to send their revised manuscript to a professional English language editing company or a native English-speaking expert to polish the manuscript further. When the authors submit the subsequent polished manuscript to us, they must provide a new language certificate along with the manuscript.**

-Our manuscript has been polished by a native English-speaking expert and an online language program Grammarly.

Once this step is completed, the manuscript will be quickly accepted and published online. Please visit the following website for the professional English language editing companies we recommend: <https://www.wjgnet.com/bpg/gerinfo/240>.

## 6 EDITORIAL OFFICE'S COMMENTS

Authors must revise the manuscript according to the Editorial Office's comments and suggestions, which are listed below:

**(1) Science editor:**

In the study of covid-19 coronavirus diseases, the authors evaluated the research status of respiratory, cardiology, nervous system, digestive system, rheumatism, urogenital system and skin system complications of covid-19 diseases from a long-term perspective. On the whole, the manuscript is well written. The problem is that there are many related similar literatures, and the manuscript does not explain the literature retrieval. There is no picture of covid-19 multiple organ involvement.

Language Quality: Grade B (Minor language polishing)

Scientific Quality: Grade C (Good)

-In PubMed, unfortunately there are not many different articles on post-COVID-19 syndrome. Indeed, literature retrieval was explained in the abstract. However, we added how we made the literature retrieval in the introduction. We think that the picture would not be necessary, since we had a table in the article.

***(2) Company editor-in-chief:***

I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Methodology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please be sure to use Reference Citation Analysis (RCA) when revising the manuscript. RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. For details on the RCA, please visit the following web site: <https://www.referencecitationanalysis.com/>. Authors are required to provide standard three-line tables, that is, only the top line, bottom line, and column line are displayed, while other table lines are hidden. The contents of each cell in the table should conform to the editing specifications, and the lines of each row or column of the table should be aligned. Do not use carriage returns or spaces to replace lines or vertical lines and do not segment cell content.

- Column lines are displayed in table.
