

Supplementary Figure S1 Kaplan-Meier curves of *PRDX1* mRNA expression in TCGA liver cancer patients with R0 resection. Based on the median RPM value of *PRDX1* in tumor tissues, 310 cases who had received a curative resection were divided into two groups, high level group and low level group. Log-rank test was performed to compare survival curves. A: Kaplan-Meier curves of overall survival; B: Kaplan-Meier curves of recurrence.
