

Supplementary Figure 1 Trend plot of daily number of enrolled patients, average temperature and maximum temperature in Sichuan province. Shown are the officially recorded daily maximum and average temperature in Sichuan province, as well as the daily enrollment of patients, and the unrecorded date indicates that there are no new patients. Pts: Patients.

Supplementary Figure 2 Distribution of patients with heatstroke in this study across Sichuan province. Shown are the official statistics of all documented, confirmed cases of heatstroke throughout Sichuan province. N/N donates the number of confirmed patients who were included in the study cohort/the denominator the number of involved centers for each city.

Supplementary Figure 3 Multivariable logistic regression of patients' early enteral nutrition with age, gender, body mass index, Glasgow Coma Scale score, Nutrition risk screening-2002 score and GI symptoms. GI: Gastrointestinal; BMI: Body mass index; GCS score: Glasgow Coma Scale; NRS-2002 score: Nutrition risk screening-2002 score; EN: Enteral nutrition; OR: Odds ratio.
