### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Please find attached the edited version of a very nice observation on monoclonal cryoglobulinemia in HCV.

**Answer:** Thank you for your interest in our case report and the review made by the chief-editor. We have revised it according to the amendments. But since the cryoglobulin was not only composed of monoclonal IgA we did not change the title. Indeed the cryoglobulin in our patient was a mixed and an atypical one which we discuss in the second table in the text. And again we did not exclude the last paragraph of the discussion which states an alternative technique in detection of cryoglobulin type may be needed in accurate diagnosis.
