JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

A better and shorter title, which better reflects the content and message of this nice paper could be

Sepsis associated delirium mimicking postoperative delirium as the initial presenting symptom of urosepsis in a patient who underwent nephrolithotomy:

The case history description is much and much too long. This reviewer made some indications to shorten the tekst, but should be further shortened.

Discussion

The discussion on POD vs SAD is very nice and clear.
