JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This is an interesting review on a very important topic. I have few comments: 1. I suggest to delete the OVERVIEW OF NON-ALCOHOLIC FATTY LIVER DISEASE section. 2. I suggest to create a figure on the pathogenesis of NAFLD and indicate where the Glycosyltransferases play a role in those proceses.

Answer: Thank you very much for recommendations proposed by the Journal editor-in-chief. (1) I think that the OVERVIEW OF NON-ALCOHOLIC FATTY LIVER DISEASE section may be keep as an introduction. (2) The mechanism of some of glycosyltransferases on NAFLD listed in this paper is not clear, and the possible sites of some glycosyltransferases on the pathogenesis of NAFLD were described in the context. It may be difficult to create a related satisfactory figure.
