JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This is a timely and well conceived Mini review article. Comments: 1) The review could be further strengthened by adding 2 paragraphs on intestinal progenitor cells, which are likely critical target of injury and essential for mucosal regeneration. 2) The authors may wish to cite paper: Chu EC, Tarnawski AS. Rapid colonoscopic detection and quantification of colonic ischemia by using a laser Doppler flowmeter. Gastrointest Endosc. 2007 Sep;66(3):630-2. PMID: 17521646 3. Minor errors e.g. reviewed elsewhere[9,10] ischemically etc. should be corrected
