### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This case report is interesting and it is an educational case. Endoscopic ultrasound-guided pancreatic duct drainage (EUS-PD) can be an option as a solution for treatment of the migrated pancreatic stent. In addition, this case report shows that regular stent exchange is important after treatment. Please unify description of "in situ" in italics. This case report should be accepted in World Journal of Gastrointestinal Endoscopy.
