JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Dr. Correa and colleagues have presented a revised version of their interesting study on the topic of circulating insulin-like growth factor-binding protein 3 as prognostic biomarker in liver cirrhosis. In my opinion, the authors successfully implemented the criticisms and comments raised by the reviewers in the revised manuscript. I have no additional and specific comments to the presented article. The language meets the requirements for publication now. For that I consider to accept the manuscript for publication in World Journal of Hepatology.
