### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Dr. Oramasionwu and colleagues have presented an interesting retrospective Cohort Study on the topic of antiviral treatment initiation of HCV in HIV/HCV coinfecting patients. The presented article is of high interest for the readers of WJH and well written and performed. The language meets the requirements for publication. Although the reviewers raised congruently substantial criticisms and comments, in my opinion, the authors have successfully implemented most of the major criticisms and comments. I have no additional and specific comments to the presented study. Therefore, I consider accepting the manuscript for publication in WJH.
