<input type="checkbox"/> Grade A: Excellent	<input checked="" type="checkbox"/> Grade A: Priority publishing	<input type="checkbox"/> Accept
<input type="checkbox"/> Grade B: Very good	<input type="checkbox"/> Grade B: Minor language polishing	<input type="checkbox"/> High priority for publication
<input checked="" type="checkbox"/> Grade C: Good	<input type="checkbox"/> Grade C: A great deal of language polishing	<input type="checkbox"/> Revision
		<input checked="" type="checkbox"/> Rejection

### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

I think that this manuscript is problematic. According to clinical routine, patients must be premedicated half an hour to an hour preoperatively. The usual premedication includes sedatives. If so, the method of walking into operating room for the patients would be inappropriate. In addition, the sample size of 70 patients is too small. Changing a inical routine using such a study is lack of convincing.
