JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

In the present review, the authors summarised the conclusions from four of the committees of the International Consultation on Urological Disease on male LUTS. They explained clearly the epidemiology of male LUTS, the aethiology, the patients assessment, the principle symptoms such as nocturia and the medical treatment (fythotherapy, antimuscarinics, alfa selective blockers, inhibitors of 5- α reductase and the innovative phosphodiesterase-5 inhibitors); the paper is written in a very good english language and I encourage you to accept this fine work.
