JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Even if in a retrospective fashion the authors face a very relevant topic as the concomitance of BKVN and endoarteritis caused by rejection. The relevance of the topic is due to the fact that most often the concomitance is due to a reduction in IS. The manuscript is well written, the english wording is good and add relevant knowledge to the physicians involved in renal transplantation. I recommendv to publish the manuscript on WJT
