### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

The manuscript is good and face the relevant issue of converting CNI to everolimus in the heart transplantation. The manuscript is well written. However I agree with reviewer 00742171 and the authors did not properly answered the rev concerns. As editor in chief I think the the manuscript may be published in WJT only if the authors clearly state both in the abstract and in the material and methods what they answered the reviewer: "Unfortunately, the database was closed at the end of the study; therefore, there are no data available regarding the follow-up of patients included in the study".
