JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Dear Prof Ma, I have read the article no 28412 Acetylsalicylic acid interferes with embryonic Kidney growth and development by prostaglandin-independent mechanism. It is a good study and I like very much the methodology. However, there are some contradictions in the results in the conclusion of the abstract, Page 5, the authors should change the sentence, mechanism is likely to be independent to prostaglandin synthesis inhibition may have a minor role. The same thing happens in the last paragraph of the result section page 11. The authors should clarify before the work can be published. Recommend: Publication pending revision. Thanks
