Manuscript Title:

MRI features of intrahepatic extramedullary hematopoiesis from three case reports

Date of Revision:

February 17, 2022

Abstract:

BACKGROUND: Extramedullary hematopoiesis rarely occurs within the liver alone, and it was found to be easily misdiagnosed. The radiological literature covering this disease includes exclusive case reports. There is a paucity of literature on the role of magnetic resonance imaging (MRI). The most common imaging modalities were CT and ultrasound. This report aims to provide more radiologic appearance of MRI and help radiologists establish diagnostic consideration.

CASE SUMMARY: Three patients (one male and two females) were incidentally found to have hepatic mass or nodule, without hepatomegaly or splenomegaly. Laboratory tests including liver function, serum hepatic tumor markers, and hepatitis serologic markers were normal. On MRI scans, all lesions showed lower signal intensity on in-phase image than those on out-phase image. One of the cases showed changes in signal intensity on T2WI and DWI, which shifted from hyperintensity to hypointensity with size enlargement between two rounds of imaging examination. These lesions exhibited different...

This document certifies that the manuscript listed above was copy edited for English language by LetPub, with regard to grammar, punctuation, spelling, and clarity. All of our language editors are native English speakers with long-term experience in editing scientific and technical manuscripts. We are committed to leveling the playing field for researchers whose native language is not English.

- Documents receiving this certification should be regarded as having undergone professional editorial revision for English language before submission. However, the authors may accept or reject LetPub's suggestions and changes at their own discretion and LetPub does not have editorial control over the submitted documents.
- The language quality of the submitted document is the sole responsibility of the submitting authors subject to those authors' adherence to LetPub's revisions and instruction. LetPub's provision of service does not constitute a guarantee or endorsement of the authors' work herein.
- Neither the research content nor the authors' intended meaning were altered in any way during the editing process.
