To whom it may concern:

This is to prove that the manuscript under the title of “**Familial Hemophagocytic Lymphohistiocytosis Type 2 (FHL2) in Chinese Population Caused by Mutations in Perforin-1 (PRF1) Gene: A Case Report with Pedigree Study and Literature review**” is a collaborated effort among Shaohua Bi, Liangliang Jiang, Liying Dai, Lili Wang, Guanghui Liu, and Ru-Jeng Teng. As a practicing neonatologist in United States for 27 years, I prepared and edited the last draft of the manuscript.
