Pleasanton, CA 94588

Dear Editor:

This letter is to attest that the manuscript entitled "NADPH oxidase-1 deficiency offers little protection in *Salmonella* Typhimurium-induced typhlitis in mice" has been edited by a Scientific Writer in City of Hope's Office of Faculty and Institutional Support to ensure correct grammar and use of English. The Office of Faculty and Institutional Support provides manuscript writing and editing services to City of Hope investigators and is staffed by native English speakers who have all obtained PhD degrees in the biological sciences. We trust that the grammar of the attached manuscript is now sufficient for acceptance.

Best regards,

Keely L. Walker, PhD  
Manager, Scientific Writing and Editing  
Office of Faculty and Institutional Support
