To whom it may concern

**RE: Localization and role of metabotropic glutamate receptors subtype 5 in the gastrointestinal tract**

The undersigned, formerly Associate Professor of English at the Faculty of Medicine at the University of Pavia, has read through and revised the phraseology and terminology of the above article so as to be in keeping with the standards required by native speakers of English for review articles in the medical field.

Yours sincerely,

Anthony Baldry, M.A. (Cantab.)
