

## English edited by a native speaker statement

To Whom it may concern

Our manuscript entitle “**Acoustic radiation force impulse predicts long-term outcomes in a large-scale cohort: high liver cancer but low comorbidity in the HBV group**” was edited by one of our author Adam P Harrison (author 2) who is a English native speaker.

Dar-In Tai

Chang Gung Memorial Hospital

A handwritten signature in cursive script, appearing to read 'Dar-In Tai', written in black ink.
