**Re: Biliary complications after liver transplantations: a CT and MRI imaging pictorial review**

Dear Editors,

Please find enclosed the revised version of the article entitled “*Biliary complications after liver transplantations: a CT and MRI pictorial review*”, prepared as instructed for publication in World Journal of Gastroenterology and revised based on to the reviewers’ suggestions.

This article has not been published previously nor it is under consideration for publication elsewhere. We feel this article contains material that would be of interest to those who read your journal and hope that it will be accepted for publication in same. The manuscript has been proofread and corrected by Dr. Federica Vernuccio, Prof. Umberto Cillo, and Prof. Emilio Quaia, who have international reputation in the radiological and surgical field in their respective roles. Dr. Vernuccio owns a B2 level certificate for English language and worked for almost one year at Duke University in North Carolina, USA. Prof. Quaia served as Senior Lecturer – Honorary Consultant in Radiology, University of Edinburgh (UK) from September 2016 to July 2018, and then also as Honorary Clinical Senior Lecturer at University of Edinburgh (UK).

With kind regards,

Dr. Federica Vernuccio, MD, PhD, Doctor Europaeus, FESGAR  
Radiologist, Qualified as Associate Professor in Radiology (ASN)  
Department of Radiology  
University Hospital of Padova  
Padova, Italy
