Dr. Andrzej S Tarnawski  
Editor-in-Chief  
World Journal of Gastroenterology

Dear Dr. Tarnawski,

Enclosed please find the revised version of our manuscript entitled “*Omics-based biomarkers as useful tools in Metabolic dysfunction-associated steatotic liver disease (MASLD) clinical practice: How far are we?*”. The authors are deeply grateful for the reviewers’ comments and thorough suggestions to improve the manuscript.

We made the necessary modifications in the manuscript to improve the English. However, we don’t have the resources to pay for a native speaker service. Argentina is currently going through a severe financial crisis, and all services from abroad are practically impossible for us to pay for since there are a lot of restrictions on using foreign currencies.

However, we are confident that the article improved much after the peer review and even more after improving its grammar.

I hope you understand this situation, and we are more than open to discussing it further.

Awaiting your kind reply, I remain respectfully yours.
