To whom it may concern

I have carefully re-read the manuscript "Circulating cytokines and outcome in metastatic colorectal cancer patients treated with regorafenib" by Ricci V et al.

I have co-authored 61 peer-reviewed scientific papers in English (list downloadable from <https://www.ncbi.nlm.nih.gov/pubmed/?term=frumento+g>), and in the last ten years I have been working in the UK at the University of Birmingham, where I got my PhD.

Best regards
