

17 August 2020

Dear Editor,

It was my pleasure to read and make suggestions for the paper entitled “COMMON BILE DUCT LESIONS: HOW CHOLANGIOSCOPY COULD HELP RULE OUT AN INTRADUCTAL PAPILLARY NEOPLASM OF THE BILE DUCT” for publication in the Short Report. In my opinion, the English style is correct.

I have helped with previous papers prepared by Dr Conigliaro and her team that have been accepted for publication in Medical Journals with high impact factors, including Endoscopy, American Journal of Gastroenterology, and others.

Yours sincerely,

A handwritten signature in black ink that reads "Melissa Marshall". The script is cursive and fluid, with the first name "Melissa" and the last name "Marshall" clearly distinguishable.
